

David Nangoi

Cybersecurity Engineering Student

Quick Profile

A Cyber Security Engineering student at Victoria University, has a record of a scholarship before. I'm seeking a role in the workfield where I can apply my skills and learn from experienced individuals and leaders.

- Great foundation in C/C++, proficient in java & python
 - Proficient in UNIX systems with extensive hands-on experience
 - Strong familiarity with networks and systems
-

Work Experience

Part Time Tutor (for VUW), C++ Programming & Networking & Cloud February 2024 - Present

- Assisted students by providing guidance on C++ programming concepts, debugging, and problem-solving techniques.
- Helped students understanding the OSI layers (mainly layer 2, 3, 4, 7)
- Helped students familiarise themselves with UNIX systems (Raspberry pi), as well as gitlab environment

Digital Forensics Intern at Polda Metro Jaya (Indonesian Police) January 2026 - February 2026

- Analysed 2 system breaches in order to provide comprehensive reports to be taken to the GRC and other stakeholders.
 - Undertake 1 Windows, 1 Linux systems forensics using multiple Open Source Softwares.
 - Analysed a company breach logs to figure out the cybercrime individual (attacker's) intention.
-

Education

Bachelor of Engineering (Hons), Majoring in Cybersecurity

February 2023 - November 2026

- **Scholarship:** UP Education Excellence Scholarship (\$3,000 in 2022)
- **Relevant Coursework:** Strong academic performance in cybersecurity coursework including but not limited to: CYBR 271 (Code Security), CYBR 373 (Governance, Risk & Compliance), NWEN 243 (OSI layers, clouds e.g. AWS).
- **Notable Achievement:** Top 10 team finish at NZCSC 2023 (out of 52 teams)

Skills

Technical Skills

- **Programming Languages:** Java, C/C++, Python, R.
- **Databases:** Familiar with SQL.
- **Customer Service:** Managed 100+ tutoring sessions to monitor students
- **Network Security:** Extensive experience with Nmap, network switches, and network security evasion (3 personal projects)
- **Buffer Overflow Exploits:** Completed 2 university projects and 3 personal projects
- **Web Application Security:** Burp Suite for front-end attacks including XSS, SQL injection, and CSRF. 1 university project and 3 personal projects.
- **Cryptography:** Familiarity with cryptographic knowledge e.g. AES, RSA, ECDHE, Blockchain (Cryptocurrency), TORs, VPNs.
- **Network and Cloud:** Extensive knowledge in OSI model, specifically layer 2-4, Networking protocols, and hands on experience with AWS Cloud Infrastructures e.g. Load balancing.
- **CTFs:** Entered NZCSC2023 and ended up in the top 10 team out of 52. Active in multiple CTF platforms, including but not limited to: TryHackMe, HackTheBox, CTftime, etc.

Soft Skills

- **Teamwork:** Collaborative in diverse environments to achieve common goals
- **Critical Thinking:** Able to analyse complex problems and develop effective solutions
- **Problem-Solving:** Skilled at troubleshooting and resolving technical and logical issues
- **Adaptability:** Quick to adjust to new challenges and learning environments
- **Analytical Mindset:** Proficient in analysing data and systems to make informed decisions

Certifications/Achievements

- Completed Tryhackme Red-Team/Pentesting Module
- Accredited coaching module for Badminton NZ
- Full Class 1 (Car) License

Extra-Curricular Activities

Badminton | Division 2 National Player (2024-Present)

- Top 15 nationally ranked player in New Zealand, #2 in Wellington region
- Compete at national level tournaments representing Wellington North

Chess | Player (1900+ rating)

- 1st place, Victoria University of Wellington 2025 tournament

- Active in competitive university chess club
